# JOSHUA WETZEL

225-305-9321 | jawetzel615@gmail.com | linkedin.com/in/joshua-wetzel | github.com/jawetzel

Full-stack developer with 6+ years of experience building and modernizing applications across **.NET Core, Node.js, React, Angular, SQL, and MongoDB**. Proven track record of independently owning enterprise systems end-to-end, modernizing legacy codebases, and delivering features directly from stakeholder requirements. Leverages **AI coding tools (Claude Code, OpenAI Codex)** daily to accelerate delivery, automate research, and drive large-scale data repair and refactors. Effective in both fully remote and on-site environments.

## EXPERIENCE

### Tri-Core Technologies
Oct 2021 – Present · Remote

Software Developer

.NET Core · ASP.NET · Entity Framework · SQL · Angular · Node.js · MongoDB

- Served as the sole developer on **Fastlane**, an enterprise financial tax incentive platform built on **Angular, .NET Core, and MongoDB**.
- Delivered new features and system upgrades with minimal oversight, ensuring 100% platform reliability under a long-term maintenance contract.
- Partnered directly with project managers to translate complex business requirements into scalable technical solutions.
- Upgraded legacy components to modern standards, significantly improving system stability for ongoing client operations.

### Lipsey's LLC.
Dec 2019 – Oct 2021 · On-Site & Remote

Software Developer

.NET Core 3 API · React · Node.js · PostgreSQL · AWS · Twilio · Sentry

- Modernized legacy **VB applications** by architecting a new **.NET Core API** with a **React** front-end.
- Gathered requirements directly from stakeholders and customers to define and deliver feature expansions.
- Administered cloud infrastructure (**AWS SES/RDS/S3**) and managed **IIS/Apache** server environments.
- Provided technical support and integration guidance to external partners and customers.
- Successfully transitioned the role from on-site to fully remote while maintaining consistent delivery cycles.

## PROJECTS

### CookJunkie — Content Hub
cookjunkie.com

Next.js · Node.js · Programmatic SEO

Engineered a high-performance resource hub utilizing programmatic SEO strategies to automate content generation and maximize organic search visibility.

### Weekend Plant — Gardening Content Site
weekendplant.com

Next.js · MongoDB · Cloudflare R2 · OpenAI

Informational gardening platform featuring plants, how-to guides, and plant combinations, with AI-assisted content generation and an image pipeline backed by Cloudflare R2.

### Vorbiz — Mobile App
vorbiz.net · Google Play · App Store

React Native · SQLite · Node.js · PostgreSQL

Mobile app that enables vendors to accurately record sales for sales tax reporting, with support for QR-based item entry, offline-first storage, and PDF export.

### TutorTab — Scheduling & Invoicing
tutortab.net

Next.js · React · MongoDB · Stripe Connect · Google Calendar API

Scheduling, reminders, and invoicing platform for independent tutors — syncs sessions with Google Calendar, auto-generates invoices, and handles parent autopay via Stripe Connect.

### Kindlr — Social Mobile App
kindlr.net · Google Play

React Native · Node.js · SQL

Social dating app with AI-powered photo moderation, behavioral matching, and location-based meetup features. Published on Google Play.

## SKILLS

**Backend:** .NET Core, Node.js, Supabase, Railway, RevenueCat **Frontend:** React, React Native, Expo, Next.js, Angular, TypeScript

**Data:** SQL, PostgreSQL, MongoDB, SQLite **Tools:** Git, Twilio, Sentry, Bruno, Linux

**AI:** Claude Code, OpenAI Codex — coding, research, and data repair workflows

## EDUCATION

B.S., Computer Science — Southeastern Louisiana University 2015 – 2019
