Full Stack Software Engineer with 6+ years of experience building and modernizing applications across **.NET Core, Node.js, React, Angular, SQL, and MongoDB**. Proven track record of independently owning enterprise systems end-to-end, modernizing legacy codebases, and delivering features directly from stakeholder requirements. Integrates AI into shipped products via the **Anthropic and OpenAI APIs** — agent orchestration, content automation, and large-scale data-repair pipelines. Effective in both fully remote and on-site environments.

## EXPERIENCE

### Tri-Core Technologies

Oct 2021 – Present · Remote

#### Full Stack Software Engineer

.NET Core · ASP.NET · Entity Framework · SQL · Angular · Node.js · MongoDB

- Developed **Fastlane**, an enterprise financial tax incentive platform built on **Angular, .NET Core, and MongoDB**, collaborating with a development team and project managers.
- Delivered new features and system upgrades end-to-end under a long-term maintenance contract.
- Partnered directly with project managers to translate complex business requirements into scalable technical solutions.
- Upgraded legacy components to modern standards, significantly improving system stability for ongoing client operations.

### Lipseys LLC.

Dec 2019 – Oct 2021 · On-Site & Remote

#### Full Stack Software Engineer

.NET Core 3 API · React · Node.js · PostgreSQL · AWS · Twilio · Sentry

- Modernized legacy **VB applications** by architecting a new **.NET Core API** with a **React** front-end.
- Gathered requirements directly from stakeholders and customers to define and deliver feature expansions.
- Administered cloud infrastructure (**AWS SES/RDS/S3**) and managed **IIS/Apache** server environments.
- Built and documented integration paths for external partners consuming the company's APIs.
- Successfully transitioned the role from on-site to fully remote while maintaining consistent delivery cycles.

## PROJECTS

### CookJunkie — Content Hub

[cookjunkie.com](https://cookjunkie.com)

Next.js · Node.js · Programmatic SEO

Engineered a high-performance resource hub utilizing programmatic SEO strategies to automate content generation and maximize organic search visibility.

### Weekend Plant — Gardening Content Site

[weekendplant.com](https://weekendplant.com)

Next.js · MongoDB · Cloudflare R2 · OpenAI

Informational gardening platform featuring plants, how-to guides, and plant combinations, with AI-assisted content generation and an image pipeline backed by Cloudflare R2.

### Vorbiz — Mobile App

[vorbiz.net](https://vorbiz.net) · Google Play · App Store

React Native · SQLite · Node.js · PostgreSQL

Mobile app that enables vendors to accurately record sales for sales tax reporting, with support for QR-based item entry, offline-first storage, and PDF export.

### TutorTab — Scheduling & Invoicing

[tutortab.net](https://tutortab.net)

Next.js · React · MongoDB · Stripe Connect · Google Calendar API

Scheduling, reminders, and invoicing platform for independent tutors — syncs sessions with Google Calendar, auto-generates invoices, and handles parent autopay via Stripe Connect.

## SKILLS

**Languages:** C#, TypeScript, JavaScript, SQL, HTML, CSS

**Backend:** .NET Core, ASP.NET, Entity Framework, Node.js, Express, Next.js, REST APIs    **Frontend:** React, Next.js, Angular, React Native

**Databases:** SQL Server, PostgreSQL, MongoDB, SQLite    **Cloud & Infra:** Railway, Cloudflare, Cloudflare R2, AWS (SES, RDS, S3), IIS

**Integrations:** Stripe Connect, Twilio, Google Calendar API, Meta Graph API    **AI:** Anthropic API, OpenAI API, Google GenAI, agent orchestration

**Tooling:** Claude Code, Git, Playwright, Vitest

## EDUCATION

B.S., Computer Science — Southeastern Louisiana University

2015 – 2019
